That's a Wrap: Easy-to-Store Wrapped Box

What you'll need:

- box
- Straw Plastic Table Cover*, Desert Sand Plastic Backdrop*, or Stone Wall Plastic Backdrop*
- scissors
- clear packing tape

What you'll do:

For easy storage, wrap the box while it is flat.

Step 1: Cut a piece of plastic that is big enough to cover both sides of the flat box and over the edge of each of the flaps of the box.

Step 2: Wrap and tape in place, working your way around the whole box. Secure the plastic on all the inside flap edges.

Step 3: Cut the plastic at each seam, and add rolled tape to secure the plastic.

[This may need a picture]

Step 4: Build into a box. Tape the flaps of the box or fold the ends in, requiring no tape.
