

## Leaf Ceiling

### What you'll need:

- 1 roll of green plastic table cover
- black poster board
- scissors
- Leaf templates (download from VBS Tools)
- pencil

### What you'll do:

**Step 1:** Trace various types and sizes of leaves on the poster board.

**Step 1:** Cut out the leaves.

**Step 2:** Hang the green table covering in long billowing strips from the ceiling. To do this attach the tablecloth to the ceiling, then let it sag down a couple of feet, and then attach it to the ceiling again, leaving about an 8-foot distance between each place you attach it to the ceiling.

**Step 3:** Place the leaf cutouts on top of the green table covering.

**Tip:** If you tape the leaves down, you will see the tape when you look up at the leafy ceiling. The leaves should stay without tape. If needed, spray adhesive works to adhere the leaves to the table covering.
