

Fabric Leaves on Wire

What you'll need:

- fabric leaves
- 18-gauge green floral wire
- hot glue
- poster board or thin cardboard (like cereal boxes)
- scissors
- pencil

What you'll do:

Step 1: For a small leaf, cut a piece of thin cardboard $\frac{1}{2}$ " wide and about 2" shorter than the length of the leaf. For large leaves, trace the leaf on a piece of thin cardboard to create a pattern. Then cut out the cardboard about $\frac{1}{2}$ " smaller than the traced image. For each large leaf, you will need a cardboard piece cut $\frac{1}{2}$ " smaller than the leaf.

Step 2: Place hot glue on the cardboard, then put a floral wire in the center of the cardboard. Press the fabric leaf into the glue, sandwiching the floral wire between the cardboard and the fabric leaf.
